EDUCATION

Boston University | *Expected to graduate by January 2026*

Boston, MA

Master of Science in Business Analytics

Sep. 2024

- **Relevant Courses:** Business Analytics Foundations, Operations Management, Financial Concepts, Quantitative and Qualitative Decision-Making, Intro to Python and SQL, Data Mining, Marketing Analytics, Cloud & Big Data Analytics

Narsee Monjee Institute of Management Studies (NMIMS University)

Mumbai, India

Bachelor of Business Administration, Marketing

July 2021

- **Relevant Courses:** Business Analytics, Marketing Analytics, Operations Research, Quantitative Techniques I & II, Research Methodology

PROFESSIONAL EXPERIENCE

AECOM

Mumbai, India

Project Analyst Intern, Aviation & Transportation

Sep. 2023 – June 2024

- Spearheaded development of a PowerBI dashboard to monitor monthly and cumulative performance across 10+ construction zones, improving operational visibility for senior leadership.
- Collaborated cross-functionally with 15+ stakeholders to define key project KPIs, integrating physical and financial progress into an interactive reporting platform.
- Streamlined multi-source reporting processes, reducing data consolidation time by 30% and enabling leadership to proactively address resource bottlenecks.

Zycus

Mumbai, India

Business Development Analyst, Global Enterprise Sales & BD

July 2022 – Aug. 2023

- Partnered with technical sales leadership to identify new market opportunities for AI-driven procurement tools, contributing \$200,000 in new client revenue.
- Built and maintained Salesforce dashboards to track key metrics (pipeline velocity, revenue growth), enabling data-driven decisions and a 25% boost in deal closure speed.
- Led market intelligence research on supply chain automation trends, directly informing GTM strategies that resulted in a 42% increase in qualified leads

Ernst & Young (EY)

Mumbai, India

Data Analyst Intern, Infrastructure Advisory (Strategy & Transactions)

Sep. 2021 – Mar. 2022

- Conducted comprehensive data collection for Gujarat Maritime Board's cargo flow study, categorizing 300+ commodities across 10 ports to support infrastructure optimization.
- Developed traffic forecasts using time series analysis to project trends through 2040, helping reduce vessel congestion by 25% via smarter cargo distribution planning.
- Designed and administered stakeholder surveys using Qualtrics, gathering feedback from 60+ port executives to support creation of a Traffic Intelligence Unit.

CORE SKILLS & COMPETENCIES

- **Languages & Tools:** SQL, Python (pandas, NumPy, seaborn, matplotlib), R (tidyverse, ggplot2, dplyr, plotly), Tableau, Power BI, Salesforce CRM, AWS EC2, Git, Excel (PowerQuery, VLOOKUP, Pivot Tables)
- **Analytics & Modelling:** Predictive Modeling, Time Series Forecasting, K-Means Clustering, RFM Segmentation, Process Optimization, Bayesian Statistics
- **Core Competencies:** Data Storytelling, Client-Focused Solutions, Cross-Functional Collaboration, Dashboard Design, Root-Cause Analysis, Process Mapping

PROJECTS

GitHub – [Advait Pillai](#)

VSAV Trading Strategy - Backtesting Volatility-Sentiment Models in Python

- Developed a regime-aware trading algorithm combining Vortex Indicators, sentiment signals, and volatility-based position sizing to outperform S&P 500.
- Conducted grid search optimization to identify ideal indicator periods and benchmarked strategy performance vs. SPY.
- Built an interactive Streamlit + Plotly dashboard to visualize market regimes, performance trends, and strategic allocations

Ticketmaster Event Analytics – Pricing & Sell-Out Prediction

- Analyzed 1,000+ Ticketmaster event records to predict sell-out probability and ticket pricing using classification and regression models.
- Built Tableau dashboards to visualize pricing trends, genre demand, and promoter impact; automated SQL pipelines for KPI generation

KPMG Data Analytics Consulting Virtual Project

- Conducted RFM segmentation in Python and built dashboards to support targeting strategies in a mock consulting scenario
